Database Administration & Management LAB – BSITF21

Lab-12   19-12-2024

TOTAL MARKS: 30

Task 01: Write a series of SQL commands to change a database from NOARCHIVELOG mode to ARCHIVELOG.

Task 02: Write an SQL command to change the number of ARCn processes in a database.
What is an ARCn process? What is the maximum number of ARCn processes that can be specified?

Task 03: Write two commands each for automatic and manual archiving of redo log files.
How are they different?

Task 04: Write an SQL command to manually archive the current redo log file.

Task 05: Write an SQL command to change the current redo log file.
