Database Administration & Management LAB – BSITF21

Lab-04   17-10-2024

TOTAL MARKS: 100

Task 01: Write a command to create a new tablespace with the name `'your_name'` and store the data file in Local Disk(C). How can we auto extend the size of a tablespace?

Task 02: Write a command to create a locally managed tablespace `'loctb'` and a dictionary managed tablespace `'dictb'` with uniform extent management in both.

Task 03: Write a command to create an `UNDO TABLESPACE` with the name `'your_name_undo'`.

Task 04: Write a command to create a `TEMPORARY TABLESPACE` with the name `'your_name_temp'`.

Task 05: Write a command to make the `TEMPORARY TABLESPACE` in Task 05 a `DEFAULT TEMPORARY TABLESPACE`.

Task 06: Write a command to display the `DEFAULT TEMPORARY TABLESPACE`.

NOTE: Keep the initial size of your tablespaces 10 MBs.
